

ABSTRACT OF THE DISCLOSURE

The invention relates to a head-up display system including a transparent plate; a liquid crystal display for generating a display light of information; and a laminate of  
5 first and second  $\lambda/4$  films. This laminate is placed on a display panel of the liquid crystal display such that the display light is changed into S-polarized light or P-polarized light and that the S-polarized light or the P-polarized light is incident on the transparent plate. The laminate of first and second  $\lambda/4$   
10 films may be replaced with a single  $\lambda/2$  film.
